

MASS INQUISITOR

Stop searching and start finding people.

Cell phone and non-published data available!

"Ask and you shall receive." We found this promise simple and inspiring. "Just ASK and you get what you're looking for?" Brilliant!

So that's why, as experts in data retrieval, we decided to create a product that operates on the simple Ask-and-Receive promise. No more monkeying around. No more dialing 411 or wasting time on low-quality internet data. No more paying high rates or paying for unnecessary data.

You want to find people? Just ask.

MASS INQUISITOR is the ultimate tool for people who need to find people. We give you access to the latest, most accurate and most complete data on the people you need to find. It's as easy as using MASS INQUISITOR.

What makes us the best:

- Cell phone and non-published data
- Search using any scrap of information you have
- Customer-tailored batching
- Easy online interface so you can search from any computer
- Easy to use API for developers
- Unbeatable pricing where you only pay for the info you want
- Genuine 24/7 customer support
- Plus, the industry's first guarantee – you'll get the right results or your money back.

As keeper of industry-leading databases, MASS INQUISITOR has the best information:

- 210 million cell, non-published and unlisted business phone numbers
- 150 million landline numbers updated daily
- 300 million Social Security Number records - DOD included
- Bankruptcy, home ownership (mortgage data), liens and judgments
- In the works - Vehicle data, email addresses, employment information (POE), cell phone text messaging, FEIN data and credit headers

MASS INQUISITOR is the ideal resource for collection agencies, skip tracers, private investigators, law enforcement or any organization that needs to find people – the right people – quickly.

Contact us today to set up access or to discuss your organization's needs.

MASS INQUISITOR

Stop searching and start finding people.

Why is it getting more difficult to find people?

Phone books are obsolete and free internet search sites are inaccurate. Locating people proves more difficult than ever. The top reasons:

- **210** million unlisted cell phones in the U.S.
- **7.5** million people are cell phone only users, growing rapidly
- **17%** of landline phones (**27 million**) are non-published, growing rapidly
- Many direct inward dial business numbers are **unlisted**
- Americans are transitory, moving about **once every 5 years** (17% of the population moves every year)
- Recent mortgage and economic problems are forcing many people to lose their homes and move to a new address or move in with relatives.

MASS INQUISITOR is the ultimate tool for people who need to find people.

MASS INQUISITOR Services

Internet DA

Internet Directory Assistance gives you access to current landline, cell phone and non-published listings through an easy, web-based interface. You get full access to residential, business and government listings for the U.S., Puerto Rico and Canada. Our powerful and flexible search capabilities include reverse telephone look-up, address, searches using house number ranges and surnames using just a few letters of the last name – all at the city, zip, state and national levels.

Internet SSN

Gain access to our national Social Security Number database. Generate searches using SSN, name, address, previous address or phone number. Results include the most recent address, previous addresses with residency dates, street address with residence history and a link to new addresses, date of birth and exact date of death, as well as spousal names and known aliases. This database identifies all potential family members with their contact information. Family members have proven to be a valuable source of additional information.

Batch Services

We have developed the collection industry's premier batching service. Batching allows you to easily automate your collection process, saving you valuable time and money. Clients using our batching services typically search for current addresses and/or phone numbers. The results can also include cellular and non-published numbers, property information, bankruptcy data, next door neighbors, date of death and nearest relatives. We run your files using our proprietary batch logic and search engine. We guarantee our results. Best of all, we only charge for found results rather than on a per record inquiry basis.

Contact us today to set up access or to discuss your organization's needs.
